

Town Council Meeting Held Monday Evening

Legislative Relief Committee to Meet Here July 20

Regular meeting of the Town Council met last Monday evening and Mayor and all councillors were present.

A contract for the painting of the town water tank was made with Mr. R. G. Wilson and arrangements made for when contract should be completed.

The W. L. McKinnon Co. as representative of bond holders were council of present projects. The matter was left over for investigation.

A letter from the Utilities Commission was left for a later meeting.

Mr. Colvett requested council to allow more of a building and council agreed.

A letter from R. Rodmond, a former resident of town who is now out west, wrote council asking for him to be brought back to town. The matter was left for authorities to decide.

Mr. J. Kitchen, town foreman, asked for two weeks holiday this month. His request was granted.

The School Board requested for the use of town scrap from which they wanted for school property improvement. The request was granted.

Tax Sale for unpaid taxes on town property was set for September 15th 1938.

Accounts as approved by the finance committee were passed for payment.

A motion was passed for insurance of accidents of town employees in connection with the town truck and fire department.

A letter from A. U. Bouscain, chairman of the Legislative Relief Committee, notified council that a meeting will be held in Redcliff at 2 p.m. on Wednesday July 20th. Miss Gustick and Dr. Robinson, Calgary and Medicine Hat S. C. members of the Legislature are also on this committee.

Ice Cream Lawn Social by St. Andrew's W. A. Tuesday afternoon and evening, July 19th at Mrs. Fred Omer's. Also sale of Home Cooking. Everyone welcome.

America sportsman flow from New York to Paris in 16 1/2 hours.

EDMONTON EXHIBITION July 18 to 23

ONE-WAY FARE FOR ROUND TRIP

Special stations in Alberta, Saskatchewan and British Columbia (Vancouver and Seattle)

TICKETS ON SALE JULY 16 to 22

and on July 28 for trains arriving not later than 3 p. m.

Return Until July 26

Swimming Pool Meeting To-Night

Will be Held in The Legion Reading Room

There will be a meeting of the local Swimming Pool committee to be held in the Legion reading room this evening (Thursday). All members are requested to be present as important business will be discussed.

I.O.O.F Meeting Held Here Wed. Evening

Medicine Hat Officers Installed Several New Members

A meeting of the local I.O.O.F. Lodge was held here yesterday evening.

As a number of new members have joined this lodge there was a large attendance and a number of visitors from Medicine Hat. Officers of the Medicine Hat Lodge put on the work of installing the new members.

After the meeting refreshments were served and there was also an interesting program.

Considerable Damage From Hail Storms

South End of the Province Had Several Storms

Reports from Lethbridge state that hail damaged South Alberta's crops over the week-end.

At Monarch 20 miles west of Lethbridge hail did 80 per cent damage to 3,500 acres of standing crops, while at Eastend, on the border of Saskatchewan, south of Medicine Hat, hail did 75 per cent damage on a mile-wide stretch several miles long.

DROWNING LIST OF THE FATALITIES

A toll of 22 violent deaths was recorded in Canada over the week-end—the most disastrous of any similar period this year.

Thirteen persons drowned—four when a motor truck plunged into the Quennell River in British Columbia.

Six persons were killed in automobile crashes, two in other mishaps and a young Toronto woman died of heat prostration.

Wo Tung, owner of a large vegetable garden in town, met with an accident between here and the Hat Tuesday evening. His car turned over in the ditch but fortunately he was not hurt. His car was slightly damaged.

Mrs. Lydia Dickhaut of Medicine Hat won the Ford V-8 for her sedan which was drawn at the fair grounds at the Hat Stampede. The car was on the drawing by the Medicine Hat Kinmen Society. The ticket was drawn by a little girl, Mary Lutz.

The Holy Land is in a state of terror as phones line cut, shops closed property burned and lives taken.

Warning that Alberta does not require outside harvest help was given today by Hon. Dr. W. W. Cross, Alberta minister of health and relief.

Hon. R. J. Manion

Who was chosen as leader of the Conservative party of the Federal house, at the large convention held in Ottawa last week-end.

Expect Meetings For Irrigation Near Here

Hope To Get Meeting With District and Members

It is expected that a meeting will be held soon with Federal and Provincial members and committees of this district to discuss the question of securing irrigation for around this district and several miles west.

There is no doubt that a large percentage of the farmers, city and town citizens are interested in this movement and are all anxious to get some water over crops.

Just what residents and officials may have opinions there is no doubt that all can work together in order to bring improvements in the district.

Manning Warned About Legal Action

Outside Companies to be Liable For Trade Business

Provincial Secretary E. C. Manning warned that legal action would be taken in 30 days against "certain outside companies carrying on business in Alberta without being registered under the companies act."

The minister announced action also is planned against representatives or agents of such companies who are not properly licensed under the licensing of trades and businesses act.

British Govt. Offers Canadian Training Base

For Huge Supply of Training For Royal Air Force

Latest news has been to the effect that the British government has arranged for an expenditure of one billion dollars for a huge supply and training base for Britain's Royal Air Force in Canada.

The article states this was indicated that American aircraft manufacturers would establish a Canadian plant on a guarantee of 1,000 planes and also a training field.

Canada would hardly remember

Dr. R. J. Manion New Conservative Federal Leader

Was Chosen at the Convention Last Week-End

Dr. R. J. Manion, who was chosen as leader of the conservative party in the Federal Parliament, at the convention last week-end, was born in Pembroke Ont., Nov. 19th 1891. Later he moved with his parents to Fort William where he gained his preliminary education, later attending Queen's University and University of Toronto with postgraduate course in Medicine in Glasgow and Edinburgh.

The war called Manion to France where he served first with the French army medical corps and later with the Canadian, winning the Military Cross at Viny Ridge.

In the 1917 election, Manion was selected Liberal candidate for Fort William, although still in France. He had been an adherent of the Liberal party up to that point but he turned Unionist and contested the riding against Liberal opposition and won. He was returned as a Conservative for Fort William at every election following until 1935 when he was defeated.

Just prior to the 1921 election, Manion was minister of the newly organized department of soldier's civil re-establishment, but his party went out of power in the 1927 election. He was postmaster-general in the short-lived Mulholland government of 1916.

When the Conservatives came back to office after the 1936 campaign, he was chosen minister of railways.

After taking up practice of medicine at the Ottawa General Hospital, Manion married Yvonne Desaulniers, member of a distinguished Quebec family. They have three sons. He is a Roman Catholic and has long resided in Ottawa.

A seat for the new leader in the house of commons appeared assured at once as Mr. George Black, member for the Yukon, announced he would resign his seat in his favor and ask Prime Minister Mackenzie King to give him an acclamation.

At the Toronto Conservatory of music examinations Cyril G. Morris passed with first class honors in his music of the violin in the honors of history Kathleen Sheasby also passed. Both are of Redcliff.

Mrs. (Dr.) Lowden, of Port Haney, B. C. is visiting here this week with her aunt and uncle Mr. and Mrs. E. L. Stone.

The Misses Fern and Inez Rindell who have been visiting with their father for the past week left for Banff last Sunday.

Mr. A. A. Riley formerly of Medicine Hat but now an inspector of Alberta government, was in town last week-end inspecting several businesses while here in his department. He made a new tax on a few lines of business.

It is reported that Ontario and Quebec will offer a good market for western stockers

A Girls Ball Game Here Friday Evening

There Will Be a Dance in Cliff Hall After The Game

On Friday evening this week the Set Ball girls from Tilley will be here to play a game with our town girls.

Both these teams are fairly good players and they had a fine game in Tilley a week ago. This game will be well worth seeing so all be there to see it.

After the ball game our town girls are having a dance in Cliff Hall to entertain the visitors. All our citizens are invited to be at the dance so be sure to be there.

Deadly Horse Disease Eased By Serum Use

Report 300 Cases of Horses in Manitoba District

Encephalomyelitis, the deadly disease that attacks the brains of horses, eased slightly in Manitoba during the week-end, Provincial Department of Agriculture officials announced.

Widespread rains throughout the Province last week were probably responsible for the decline veterinarians reported.

New cases, one fatal were reported in the Selkirk district. Several cases have been reported near Dauphin. Veterinarians have produced adequate supplies of serum in the Dauphin area, however, and the disease has been temporarily checked.

The most serious centre of infection continues around the Russell and Virden areas. Russell is in Northern Manitoba, near the provincial border and Virden is 200 miles west of here. In these districts 300 cases have been reported.

New Air Mission To Visit Canada

Large Bomber Aircraft May Be Made in Canada

It was announced in London England, yesterday that a new air mission to Canada under Sir Hardman Lever would be dispatched immediately. Sir King-ley Wood told the house of commons the mission would be for the purpose of entering into negotiations with the Canada Aircraft industry for the manufacture of large bomber aircraft in Canada.

Premier Mackenzie King announced on Tuesday that, starting August 1st the Canadian Wheat Board will purchase wheat from farmers without the limitations placed on such purchases during the past and the present crop years.

Citizens here from Eastern that last Tuesday was the 12th of July. On that date years ago in east there would be a big Orangemen's Celebration in almost every town and city but there is seldom one in the west now.

Progress is Made On Town's New Swimming Pool

Work is Progressing Nicely and Opening Soon

Work in connection with the erection of the town's New Swimming Pool is progressing favorably and all are of the opinion that we will have a fairly good one at the finish.

Several employees are on hand now getting everything ready so that the cement walls can be started on as soon as possible.

Already the cement is nicely laid for the bottom of the pool and it is reported in good condition.

Mr. McColeman who is in charge of this work, assures us that everything will be ready for dropping in the cement by the end of the week and will likely be completed early next week.

As considerable more work will have to be done, it will be at least a few more weeks before the new pool will be opened up.

We understand the committee will have a special program and all kinds of sport and amusement for the opening. Watch for the time and all be present.

Premier's Address in Okotoks Howled Down

Large Meeting was Held and Boos by Visitors

Forced from the platform by continued heckling and wisecracking after he had spoken less than half an hour. Premier William Aberhart concluded his tour of his home Okotoks-High River constituency in one of the wildest and most disorderly political meetings held in this province the 1935 election.

The meeting was held in the Okotoks Community Hall, with about 700 people present.

As heckling and many questions were asked which Mr. Aberhart could not answer, the premier concluded his address in a short time.

Edmonton now appears to be about 3,000 bigger in population than Calgary.

Trans-Atlantic Air Mail Is Expected To Serve Empire At About Cost Of Inland Postage

Sir Eric Geddes, chairman of Imperial Airways, said at a Press Club dinner in London that he believed a satisfactory trans-Atlantic air-mail service would be established in a year or two. Arrangements for this service already were being made in Newfoundland, he said.

The possibility of wider and cheaper empire air-mail service was mentioned by Sir Eric. With the help of the post office and the ministry, he said, "we shall be able to carry air-mail to all the empire at no more cost than the present inland postage."

Arrangements were going forward in Newfoundland, he said, "for the arrival in a year or two of what we believe will be a satisfactory trans-Atlantic mail service and then we shall have practically a whole empire whole empire." He said new aircraft which Imperial Airways was building with the help of the air ministry was their attempt to solve the long sea crossing with the certainty necessary for a mail route.

The head-hunter of Sir John is expected to be used as the Newfoundland base for a projected trans-Atlantic air-mail service forecast in London by Sir Eric Geddes, chairman of Imperial Airways. It is understood the ocean line would be linked up with the Empire and the eastern routes on the other side and with Canadian and American systems on this side.

Oppose British Meat Duty

Australia Objects Strongly To Proposed Levy On Empire Meats

Australia learned definitely that the British government will propose the imposition of a duty of two cents a pound on foreign meat, one cent on Empire meat, and discontinuance of the present quantitative restrictions on most imports when the current arrangements expire at the end of June.

The Commonwealth government is not prepared to agree to such a policy, Dr. Earle Page, deputy prime minister, said. He added it could only be introduced with the concurrence of all Empire countries and thus if objection was raised to any proposal contemplating the imposition of duties, such a proposal could not be put into effect.

Pending the forthcoming conference in London between ministers of the various governments, it is anticipated that any further arrangements will be of a purely temporary nature designed to bridge the period elapsing before a long-term policy can be agreed on and put into effect.

Simplicity Is Best

Avoid Using A Long Word When A Short One Will Do

"In writing and speaking, be simple," says Dean Alford, "be unaffected, be honest in your speaking and writing. Never use a long word when a short one will do, you always lose by using a long one."

"You lose in clearness the you lose in honest expression of your meaning, and in the estimate of all people who are qualified to judge, you lose in reputation of ability. Elegance of language may not be in the power of all of us, but simplicity and straightforwardness are."

Tree As Memorial

A suggestion has been made that throughout the Empire trees be planted to commemorate the King's Silver Jubilee, which is being celebrated this year. There is to be the most satisfactory form of remembrance and though less enduring than stone monuments and more at the mercy of the elements, trees should last until the story of their planting is lost in the mists of tradition.

Plans are under way to publish a Boy Scout magazine in Brazil, for the steadily increasing number of Scout troops in institutions for blind boys.

American scientists are searching for an elm tree which can resist the dread Dutch elm disease, now destroying thousands of these American trees.

Doctor: "And what are you suffering from?" Patient: "Head to foot."

Egypt imported more than \$1,000,000 worth of cigarette paper in the last year.

The 1935 Grasshopper Situation

Intensive Control Campaign Will Be Necessary In Canada Provinces

That large grasshopper control campaigns will be necessary in each of the prairie provinces during 1935 is the statement of officials of the Entomological Branch, Dominion Department of Agriculture, Ottawa. The situation in Manitoba is expected to be at least as serious, if not more so, than in 1934; that in Saskatchewan will probably be very much less serious, and that in Alberta is expected to be somewhat less extensive and serious than during 1934.

This forecast has been made from a survey of the grasshopper situation in the provinces of Manitoba, Saskatchewan and Alberta during the summer of 1934, by the officers of the Entomological Branch in co-operation with officials of the provincial governments. The surveys included the entire territory likely to be infested. Counting how closely former surveys have anticipated the outbreak of the following year, and the fact that they have been based upon the eggs actually to be found in the ground, there is little question in regard to the substantial accuracy of the forecast.

In spite of the widespread reduction in the "severely" and "very severely" infested areas, there will still be millions of acres of crop in each province which will require the most thorough and painstaking control measures if the greater proportion of the crop is to be harvested.

Accordingly, large scale and intensive control campaigns will be necessary in each province and the plans for the carrying on of this work, which is regarded of great national economic importance, are already in course of preparation. The campaign of 1934 was so successful in the savings of millions of dollars in crops and feed that no question will arise in respect to the support which will be given to the control work in 1935 by the individual farmers in the infested districts.

Rust-Resistant Wheats

One Of The Greatest Triumphs Of Canadian Agriculture

In two or three years' time the Dominion Department of Agriculture expects to release one or more strains of rust-resistant wheat in substantial quantities. This most important statement, coming out of the greatest triumphs of Canadian agriculture in overcoming a very destructive disease that attacks cereal crops.

As a result of years of unrelenting effort, co-ordinated by a committee known as the Associated Committee on Field Crop Diseases, strains of rust-resistant wheat, with what is believed will have the yielding ability, baking, milling, and early ripening qualities of such varieties as Marquis, have been developed. The members of this committee are representatives of the Dominion Department of Agriculture, the National Research Council, and the Western Universities and Colleges, and their work covers every phase of cereal breeding and pathological researches on rust, smut, foot-rot and other cereal diseases, has progressed with certainty in the face of what seemed to be insuperable difficulties. So that these strains of the new rust-resistant wheat may not be exploited by anyone to his own financial advantage, the distribution of the seeds will be controlled by the Central Division of the Dominion Experimental Farms, until a sufficient quantity has been produced to enable the seeds to be distributed to a large number of farmers.

An Easy Way

There have been a number of cases when cities have tried to deal with riot machines, but there appears to be no definite ruling of wide application. Saskatchewan has simplified things by having the legislature rule riot machines out of the province.

A limestone deposit containing fossils was found by geologists at the Bay of Antartic Expedition at the head of Thorne Glacier, Queen Maud Mountain Range.

The Finnish Air Defense League has established a number 700 leagues to be done by Finnish pilots in airplanes manufactured in Finland.

In a twenty-mile journey you pass trucks hauling almost everything in the manner.

This Toronto Boy Scout team has a lot of a poster, all right, but he and 3,000 brother Scouts put it across as a real shouting success when the second annual 100,000 old clothing campaign in Toronto collected for the city's needy 180,000 articles of clothing in addition to many thousand pairs of shoes.

Fast Plane Service In North

Sourdoughs Take To Air In Alaska Old Road

Pacific Alaska Airways announced a network of fast flying services over many of the famous old dog-team trails. Planes with cruising speeds of 130 miles an hour will be used, starting this spring.

Sourdoughs can take to the air in this summer's gold rush, for the planes will roar over the vast gold regions of the territory, taking men and machinery in a few hours to points where travel used to require weeks and months.

Two days once were required to go from Juneau to Dawson or White Horse by steamer or rail. One hour is the air schedule. Thus between Juneau, the capital city, and Fairbanks, the commercial center, was slashed from five days to five hours.

For three years, beginning with the king's jubilee this year, Regent street, London's fashion centre, will be floodlighted every week night.

A mirror will bring out that priceless smile of youth.

You may think you have exhausted the supply of picture possibilities in your home but the chances are that there are countless interesting subjects you have completely overlooked. It is the unusual that attracts attention but it is necessary to use your eyes and to show individuals the subjects that are so often overlooked. Mirror pictures, for instance, are fascinating and offer unlimited possibilities if you will use a little common sense. Let's take the above picture as an example.

The Finnish Air Defense League has established a number 700 leagues to be done by Finnish pilots in airplanes manufactured in Finland.

Milk Better Than Meat

Is More Nutritious According To Findings Of English Doctor

That the protein of milk is of more value for purposes of nutrition than the protein of meat has been proved by a series of experiments conducted in England by Dr. Corry Mann, who reports his findings in an issue of the "Lancet."

Dr. Mann found that where the total milk intake of the day was reduced from a pint to a half pint there was progressive deterioration in the physical condition, but when a similar reduction in protein effected by omitting some of the meat out of the diet, while maintaining the daily pint of milk, was made, there was no such physical deterioration.

The protein content of milk is not damaged by pasteurization, he declares.

The South Sea Island palm cockle blues when scuffed; its normally pink face becomes a bright red.

Prairie Poultry Marketing Plan Fails To Carry Through Majority Vote Lacking Necessary Weight

British Films

More Pictures Of British Production Being Released In United States

The presence of Michael F. Balcon, executive director of Gaumont-British Production, is causing Hollywood to take stock of the British challenge in the motion picture field.

In successive years Britain has released pictures in the United States approximately as follows: Four in 1931, 23 in 1932, 23 in 1933, 44 in 1934, and this year the total may reach 60.

London films, which made "The Private Life of Henry VIII," has several pictures about ready, including "One Hundred Years From Now," based on the story by H. G. Wells, and "Commo Raid." Currently advancing is a Gaumont-British film "The Unfinished Symphony."

While denying he is here to plant a "war" between British and United States film producers, Balcon admits that "they" may have started eyeing the American market more carefully than before.

FASHION FANCIES

The result of the vote was 62.5 per cent. for the scheme in Alberta, 64 per cent. in Saskatchewan and 54.3 per cent. in Manitoba. Some 24,327 farmers were interested enough in the marketing of their product to vote in its favor.

"Some may protest that the majority in Saskatchewan and Alberta was sufficient to bring the scheme into effect, but I think that would be breaking faith. The literature sent out by supporters of the scheme specified it should be carried by a two-thirds vote."

"The vote was not on the Marketing Act, it was for and against the particular scheme submitted by the producers themselves," the minister explained.

Understand those opposing the scheme are preparing to submit another scheme which indicates it was not the principle of regulated marketing they objected to.

One of the chief complaints was said to have been the central selling board which looked like a 64 per cent. of the country free to sell to any of the packers or other buyers of eggs and poultry.

Lifboats Tested On Shore

One Goes To Float Off Boulder Every Trip

Every time the Bremen or the Europa of the North German Lloyd Line goes back to Bremerhaven three weeks later the boat is returned to its place and another is taken off for examination. Each boat is sent to the dock for 24 hours, 24 hours, each of which carries 140 persons, and the thoroughness with which these motor-propelled boats are examined requires more time than is available during the few days the ship stays in port. Therefore, one boat goes to the plant of the builder each trip, and when the vessel gets back to Bremerhaven three weeks later the boat is returned to its place and another is taken off for examination.

Poultry producers of Saskatchewan and Alberta voted in favor of a scheme to regulate marketing of poultry and eggs under the Marketing Act. Hon. Robert W. Anderson, but the majority was not sufficient to bring the scheme into effect. The scheme was left in limbo under an adverse vote of three to one.

Several schemes under a poll being taken. In these instances the minister has been convinced there was such unanimity of opinion no vote was necessary. When private poultry producers, however, brought forward a scheme, it was recognized there was wide difference of opinion concerning it. The scheme was altered to meet requirements of the Marketing Act by the Dominion marketing board. The alterations made to appeal to producers.

The Dominion government granted \$50,000 to conduct the poll, to be divided \$20,000 for Alberta, \$20,000 for Saskatchewan and \$10,000 for Manitoba. The conduct of the campaign was left in the hands of the scheme in the prairie provinces with the provision whenever falls were third speakers opposed to the scheme should be given an opportunity to speak as well as those favoring it.

Every poultry grower with 25 poultry was given a ballot. The minister in his or her post office. The poll was held from Feb. 18 to Feb. 28.

The result of the vote was 62.5 per cent. for the scheme in Alberta, 64 per cent. in Saskatchewan and 54.3 per cent. in Manitoba. Some 24,327 farmers were interested enough in the marketing of their product to vote in its favor.

King's Bodyguard Retires

Has Occupied Responsible Position For Past Fourteen Years

A man who has "manned" the king on every occasion that His Majesty has been out of doors for the past 14 years, retired from his post today.

He is Superintendent William George Cole, police officer in attendance on the king.

The king before leaving for Sandringham called the M.V.O. on the superintendent, and, together with the queen, thanked him for his long period of loyal and diligent service.

The superintendent, who is 64, was responsible for supervising all the police arrangements when the king went outside any of his residences.

Order to the careful planning beforehand, the superintendent has never had to deal with any untoward incidents while in attendance on the king.

Mr. Cole is succeeded by Inspector Harold Green, who for several years has been attached to the queen as police officer.

Facts About The Bible

Over Three Million Letters Contained In The 66 Books

The Bible contains 66 books, of which 39 are in the Old Testament and 27 in the New Testament. The Old Testament has 39 chapters, 2314 verses, 98,498 words, and 1,283,100 letters. The New Testament has 27 chapters, 7,969 verses, 275,153 words, and 388,380 letters. For the whole Bible, the total is 1,189 chapters, 41,113 verses, 774,748 words, and 1,666,489 letters.

With the exception of a narrow compass the Bible is covered with a coat of less 3,000 feet thick; the enormous ice cap is about 1,500 miles long and 630 miles wide.

"I wonder who thought of Friday as being an unlucky day?" "Probably some poor fish."

JOHN VAN GULDER.

Methods Used By Authorities To Guard Against The Spread Of Insect Pests At Exhibitions

The outstanding success of Canadian grain growers at international exhibitions, notably at Chicago recently, are not mere matters of chance. They are index of striking evidence of the care exercised by the farmers themselves in selecting pure seed, of the creative and preservative work of the Dominion and Provincial Departments of Agriculture and of the Canadian Seed Growers' Association.

Besides the growing of pure seed, there is the prevention of disease and attacks from insect and other pests. Apart, altogether from the well-known results of the efforts of the experts of the Dominion Department of Agriculture in evolving the new, sturdy types of grain that have extended Canada's northern frontier for grain growing and mixed farming, some hitherto unknown duties of government officials in preventing and stamping out diseases at leading exhibitions have just been brought to light at the recent meeting of the Entomological Society of Ontario.

At the World's Grain Exhibition at Regina in 1934 and at all exhibitions of grain and stock the same exacting details, and a similar amount of scientific knowledge must be observed and applied. For example, at the World's Fair at Chicago in 1933 when insect pests and plant diseases were not so well understood by the general public, it was found necessary to destroy the entire collection of exhibits from many countries owing to infestation by insects. But, as at the Chicago in 1934 and at Regina in 1935, matters were entirely different. The exhibition authorities were fully informed and the authorities saw to it that these exhibitions were not the meeting place of pests and diseases from all parts of the world.

A definite line of procedure is followed in handling, inspecting and sampling exhibits for such as the wheat as the World's Grain Show. The exhibits were first made by a representative of the exhibitor, then passed to an entomological inspector who made a thorough examination, and who in turn passed the exhibit to a plant pathologist. After being passed by the plant pathologist the samples were taken by a seed inspector for the germination and field tests when required. When the samples were drawn, the metal scoop used was disinfected in a special bath after each sample was taken, and, in the case of samples for field growing tests, all were disinfected with a mercury preparation under the supervision of a plant pathologist. All exhibits of corn on the cob were superheated to guard against the European corn borer, and further it was necessary for exhibitors from foreign countries to present a bill of health for their exhibits.

The germination and field tests of grain and other exhibits to ensure the purity of strain and ensure no substitution of varieties entailed a great deal of work at Regina. This work was entirely in addition to the judging on physical appearance of the exhibit. This meant that if it were necessary to fumigate, or to treat any exhibit as a precautionary measure, the fumigant used must not injure the physical appearance of the grain nor affect its germination. Suitable fumigants were evolved after careful and critical experiment by the Cereal Division and the Seed Branch of the Dominion Department of Agriculture in co-operation. The Cereal Division made a physical examination and field germination test of the treated material and checks, while the Seed Branch carried out germination tests of the treated and untreated material in accordance with the procedure followed in the Canadian germination tests for commercial seed. Ultimately at the close of the exhibition, all display material not returned to the country of origin was destroyed in the Regina incinerator under the supervision of entomological inspectors and customs officers. Meanwhile, throughout the exhibition both the competitive and display exhibits, as well as the surplus material, were kept under close observation for outbreaks of stored product insects, but to trace of them was found.

Friend—If hear all your daughters are married now.
Wholesale Merchant—Two are sold and three are on order, and one is still to stock.

Plans can be transplanted more successfully from a dry region to one with more moisture than the dry region.

New Highway Planned

British Columbia And Alaskan Road Would Cost Around Fourteen Millions

"It would be an adventure to be able to drive north, to follow the route into the country of the gold-seekers of '88. It is an adventure of which motor tourists in thousands will avail themselves. They want to go north to Alaska and the Yukon."

Ray Clark of Wenatchee, president of the Okanagan and Cariboo Trail Association, thus expressed the possibilities which the proposed British Columbia and Alaskan highway affords, in speaking before the engineering bureau of the board of trade at Vancouver.

Mr. Clark was preceded by Col. J. M. Rolston, D.S.O., who conducted the preliminary aerial and ground surveys of the proposed route through British Columbia to the Yukon border some years ago. Col. Rolston told of the work carried out in this connection, of the different possible routes which he had down, and of the route chosen.

This was via Hazelton and up the Skeena and Klappan rivers to Dease lake and on to the lower end of "Ice" lake and thence across to Atlin. Any route east of the coast range would be the cheapest, he said, and estimated the cost along the proposed route at approximately \$10,000,000. It offers no great engineering difficulties and would be quite cheap to build as any road through British Columbia, he said.

There are five great basins which will accrue to Canada, Alaska and the United States when the road is built, Mr. Clark declared. These are:

Development of the great natural resources in the area tapped by the road.

Development of the international tourist traffic.

Development of good will and trade between Canada and the United States.

Assistance to future aerial travel.

Development of greater tourist travel on the coastal vessels, through tourist travelling by road one way and by ship the other.

The cost of the scheme has been estimated at around \$14,000,000, of which about \$10,500,000 would be spent on construction in British Columbia and the Yukon.

Major W. G. Swan, chairman of the committee, explained that 700 miles of the road are already built, as far as Hazelton. There remains 600 miles to be constructed to the British Columbia-Yukon border, 530 miles in the Yukon and 270 miles in Alaska.

More Contact Needed

To Enable Governments Of Empire To Discuss Matters

There will certainly be no lack of subjects for discussion in the preliminary conversations which must precede the ground for the next Imperial Conference, due to be held in 1936. The King celebration next year, the twenty-fifth anniversary of his accession to the throne. There will be a great gathering of Dominion statesmen in London to take part in the rejoicings, and the opportunity no doubt will be taken to discuss informally but all the more usefully, the questions which have arisen since the conclusion of the Ottawa agreement. Experience has shown that these agreements have been of great benefit and have increased the trade both ways between Great Britain and the Dominions at a time when international trade as a whole has been stagnant or even declining. Moreover, it has also cleared up doubts and omissions and has revealed differences of interpretation which call for adjustment at the next conference. Perhaps what has been demonstrated most clearly is the necessity for machinery to ensure more frequent, if possible continuous, contact between the Governments of the Empire, enabling them to discuss each point of difference as it arises and to adjust their policies to constantly changing circumstances.—London Times.

Among some African tribes the doctors, not the patients, take the medicine.

Seeing a dog stretching himself, a boy, aged 8, cried: "Aunt! Do look at Billy yawning with his back legs!"

There are now 18,032 ships sailing the seven seas equipped with radio.

PERSONALITY

—Grant in Review of Reviews, London.

Grade "A" Medium Eggs

The Egg Market Situation From The Consumers' Standpoint

Canadian housewives, particularly in the larger centres, are passing up a good bargain in not buying more Grade "A" Medium eggs, stated W. A. Brown, chief of the poultry section of the Dominion Department of Agriculture, in commenting on the present egg market situation from the consumer's viewpoint.

Reports coming to Mr. Brown from the various egg inspection offices under his jurisdiction state that the public is buying Grade "A" Large and Grade "A" Pullet eggs freely, but for some reason are neglecting the Grade "A" Medium.

Mr. Brown points out that all Grade "A" eggs are fresh and of good quality, the only difference between Large, Medium and Pullet being in size. The minimum weights per dozen are 24, 22 and 18 ounces respectively. The retail price on Grade "A" Large in Montreal to date is 45 to 48 cents. On that basis Grade "A" Medium eggs are worth at least 41 cents, but they are actually selling at 33 to 36 cents.

Eating For Health

Food Habits Can Contribute To A Long Life

That prolonging life at its prime is now largely a matter of proper diet and to that extent is something each individual can do for himself, is the lesson from the newest knowledge of nutrition, according to Dr. H. C. Sherman, Professor of Chemistry, who affirms that, instead of "digging his grave with his teeth," man can now make his food habits contribute to health and long life.

Man now has "the option of a longer lease of healthier life, of an earlier and longer prime of life, of more buoyant health throughout the whole life-cycle, as the result of taking a larger proportion of the needed calories in the form of the protective foods," Dr. Sherman states.

And by protective foods he means milk and its products, fruits, vegetables and eggs.

Developing Air Mail Service

Sir Philip Sassoon, under-secretary for air, in London, announced in the House of Commons the government had under consideration a scheme of imperial airmail development, that would provide eventually for air carriage of all first class mail. The plan calls for increased frequency of service and expedition of schedules.

Climatic Changes

Recession Of Glaciers Is Advanced As Reason For Drouth Conditions

The gradual changes in climate conditions that have brought drouths in Western Canada and parts of the United States may be caused by the recession of glaciers in the Canadian northwest and Alaska. The theory is being studied by a committee of the British Association for the Advancement of Science.

The scientists have found that the warm winds of the Pacific are not only demolishing great ice sheets in the Alton, B.C. district but are also blowing out a path across northern Canada on their way east. Formerly they were diverted by ice fields to the north. They passed through northern British Columbia to drop their moisture in rain on the Canadian and United States prairies.

Now with less ice each year in the north and no mountains to precipitate their moisture, the winds reach the 5,000-foot ice cap of Greenland. The change, Mr. Cotterworth says, seems to be making Alaska warmer and Greenland colder.

Not Always Initiative

Woman Invents Device For Finding And Identifying Radio Stations

Nearly all the psychologists agree that the feminine mind is quick and intuitive, but always initiative, never inventive. And now, with the example of Mrs. Richardson of Shepherd's Bush before them, they can guess again, for she has won the first prize at the International Exhibition of Invention by her device for finding and identifying radio stations. She may puzzle the psychologists, but will surprise none who have seen the improvements any woman can make with string, hairpins, match sticks and other simple tools, on the crude man-made gadget of her own kitchen. But woman still rocks the cradle by hand.—Manchester Sunday Chronicle.

Butter Production Down

November butter production in Saskatchewan was down one per cent, as compared with the output in November of last year, according to a bulletin issued by the department of agriculture. Production was 12,822 pounds as compared with 13,150 pounds in November, 1933.

Translations of the Scriptures were made in 11 additional languages last year, according to a London Bible society.

AEROPLANE LANDS IN THE CENTRE OF PARIS

Will Sink Shaft Two Miles Into The Earth To Determine What Is Beneath In Lower Stratas

History Of Pioneers

Stones In Old Cemeteries Yield Information That Is Valuable

The Brockville Recorder says for a number of years it has been the hobby (rather patiently endured by their relatives) of two Leeds and Grenville men to make their way into the rural cemeteries of their district in Ontario and at the expense of their clothing, to climb or vault troubling fences, lift fallen or broken stones from the mound and attempt to copy those inscriptions which remain decipherable.

Some very queer things have been discovered in the 70 or more cemeteries that have been visited—strange inscriptions and stranger epitaphs. The result of these laborious forays, however, a virtual catalogue of the early residents of this section of Ontario, one of the first to be settled, and thus an invaluable collection of information incapable of duplication.

Tombstone-hunting or graveyard-surveying is not, therefore, purely frivolity, like the "caveganger-hunting" that it may be in process of replacing. It represents a serious effort to record genealogical information before it may be passed out of existence, and should the practice, or pastime, spread to Canada (where the habitual state of country cemeteries would suggest prompt action), it may be of much value in adding to the store of knowledge concerning the pioneers that is being accumulated.

Is Clever Architect

Man With Morality Of Child Designs Modern Houses

Model modern houses designed by an architect who thinks he is dead have been on show in London at one of the most extraordinary exhibitions ever held. All the exhibits in the show have been made by mental defects and none of their workmanship displays sheer genius.

Woodworking by a boy of 14 with a mental age of seven, is described by experts as "literally amazing." Visitors were told of a man whose normal capacities are so small that he can hardly feed himself. Yet he can answer the most puzzling mathematical problems with hardly a moment's hesitation.

The exhibits were arranged by the board of mental deficiency and mental deficiency department of the ministry of health. The object was to illustrate how the state is helping to develop the latent talents of mental defectives with beneficial results.

Widows in Korea do not remarry no matter how young they may be. Even though they have only been married a month, they may not take a second husband.

In 1918 it took a workman all day to make 40 electric light bulbs. In 1919 a machine was invented that made 73,000 bulbs in 24 hours.

Sometimes it's what a woman doesn't say that puzzles a man.

The answer to the greatest of the remaining geographical mysteries is to be laid bare.

Work will begin soon on the shaft that is to be sunk two miles below the earth's surface to determine more exactly the content of earth's core. The two-mile-deep hole is being dug mainly to prove that Sir James Jeans, world famous British physicist, is wrong in his theory of the nature of the inner earth. It won't be dug south of Dinant, near the River Meuse, in France, by Felix Klein, the Belgian professor who is undertaking the project. Mining engineers will assist in locating the shaft.

Prof. Klein takes issue with Sir James' contention that the centre of earth is a fluid, molten mass. He believes the earth is solid mass and will continue to revolve in space forever. He explained:

"The only particular reason why I have chosen Dinant as the site for the excavation, it is merely topographical. My other work."

Prof. Klein, who holds the chair of geology at the noted University of Louvain, Belgium, is 45 years old, will wear a specially built and tested machine of the type used for drilling tunnels. The hole will be approximately five feet in circumference.

Samples of the earth, as the machine plunges it to the bottom, will be carefully examined by Prof. Klein.

The experiment is being financed by the National Scientific Research Fund, of Belgium, and will cost an estimated \$150,000. The fund also covers the cost of the first atmosphere ascensions.

Prof. Klein has been occupied in solving the problems of earth's inner nature for 25 years and his theory is in direct contrast with that of Sir James Jeans, who declares that the earth's crust, mountains and depressions are due to the cooling down of the interior of the earth, thus causing the surface to shrink as it cools. As an apple skin. On the other hand, says Dr. Klein:

"Earth's crust is like the varnish on a globe—just thin. Geophysically we are as to all intents and purposes in the dark. It is rank heresy to state that what can be found at the centre of the earth."

Professor Klein admits it will be a dangerous enterprise, but he is determined to carry it through despite "the jeers and laughter." He added: "I intend to go down myself and daily disprove laboratory scientists' theories. Scientific theories are constantly being disproven and I am sure you do not know a thing about what is to be found two miles under the strata."

Prof. Klein ventures recalls that in 1923 John Cross Symmes, an army officer, petitioned the U.S. Congress for aid in fitting out an expedition into the interior of earth.

He believed earth to be a hollow concentric sphere, with openings at the poles, and the interior to be inhabited. He won considerable support for his theory but failed to get congressional backing.

Good Friend To Birds

Wingsman Has Has Fed Them With His Own Hand

John A. Huston is Winnipeg's bird man. During the four years he has resided there he has walked approximately 3,000 miles to carry bread crumbs to feathered friends that frequent Notre Dame park in the west country's capital.

Three times a day during the summer months the 71-year-old veteran makes his way to a sheltered corner of the park where his approach is heralded by a whirl of wings.

The distance from his home to the park is a matter of half a mile. Two visits daily are made during the cold winter months.

The simple explanation of the old gentleman for his daily ritual was: "The excursions into nature keep me young; the exercise keeps me healthy, and watching the little fellows eat affords me the greatest of entertainment."

So long as the world is full of men who would rather listen to a complaint than a criticism, it will also be full of liars.

Mr. H. Ingrey S. C. member of
Drumheller will be in Redcliff
at a meeting on July 20th.

Mrs. Lidgett of Duhamell,
Alberta is at present visiting
friends here.

Cecil Donald and Elaine Sang-
ster are spending their vacation
with their Grandparents. Mr.
and Mrs. Smith, of Drumheller.

Mr. P. E. Birtwhistle, of the
Bingville district, has been ap-
pointed as the delegate for the
Alberta Wheat Pool Convention.

There was some very hot
weather for a few days this
week and what we want most
now is more rain.

A government hall insurance
agent is at present in this dis-
trict and several farmers are
taking hall insurance.

Miss Cox of the school staff
left last week-end for Vancouver
where she will visit with friends
for her holidays.

Mr. H. O. Taylor, representative
of the W. L. McKinnon Co. has
been in town for a few days in
connection with town debenture
matters.

Mr. Cyril Hays met with an
accident in the Glass Factory last Sat-
urday. He had his back hurt and
expects to be back to work again
in a few days.

Miss Buckholz has returned
home from Hilda School to
spend her holidays here with
parents, Mr. and Mrs. C. G. Buck-
holz.

Passengers on third street
just south of Broadway are very
much interested in the beautiful
flower garden Mr. and Mrs. A.
E. Oakland has. It is nicely
arranged and has a variety of
colors.

Quite a number of Redcliff
citizens are attending the fair
in Calgary this week.

The Mr. and Mrs. H. Sheehy
family are spending their vaca-
tions at Elkwater Lake.

Found — This year's car Lin-
coln Plate No. 10-038. May
be secured at Review Office for
cost of adv.

There was a light fall of rain
last Sunday evening and while
it lasted there was also a little
hail.

Just south of town last Sun-
day there was considerable hail
but no damage of crops was
done.

Miss Army Buckholz of South
Dakota, U. S. A., is at present
visiting her aunt and uncle Mr.
and Mrs. C. G. Buckholz.

At the Medicine Hat Stamp-
ede last week Mrs. Joe Tester
of our district won the two Ro-
man races with her horses,
which she drove.

There will be a dance at Box
Springs on Friday evening of
this week and a good program
is arranged. Fine music will
be present.

Little Kippy, son of Mr. and
Mrs. Thos. Mignault met with
an accident last Sunday and got
a bad cut on his head. Dr.
Lewis fixed up the cut.

Mr. Rod Bell, who attended
the Sarcee camp last week met
with illness and is now in the
Belcher hospital suffering from
double pneumonia.

The Bray Lake annual picnic
will be held on Wednesday July
the 20th. A good program of
all kinds of sports has been ar-
ranged for young and old.
Don't miss it.

Reports from Bingville are
that wheat crops are in fine con-
dition and several heavy rains
have dropped during the past
few weeks. S. Weber of that
district has over 900 acres of
crops and is in good condition.

Prize winners of Automotive
Industries Essay Contest were
three girls in our high school.
They were Zelda P. Bamforth,
Carol E. Sellhorn and Kathleen
Sheehy; each winning a \$10
prize. There were also three
pupils in Medicine Hat who had
won same prize.

The Redcliff Shetland ponies
purchased from the Raymond
Dubeau ranch west of town, won
several races at the Hat Stamp-
ede. The Redcliff winners
were rode by Geo. Goodine, and
Alf Goodline for first and second
at both days.
